DETAILED ACTION

1. This office action is in response to the Amendment, Paper No. 5, filed May 07, 2003.

Accordingly, claims 3 and 9 were amended. Currently, claims 1-13 are pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-13 stand rejected under 35 U.S.C. 102(e) as being anticipated by Kanou et al. (USPN 6,407,784 B1) for the same reasons set forth in the last office action. In addition, with respect to the amended claim 3, Fig. 3 shows that among the island-like multi-layered material layers, there exist the island-like multi-layered material layers whose shape of one layer is different from corresponding one layer of other island-like multi-layered material layers when the island-like multi-layered material layers are viewed in a plan view.

Response to Arguments

4. Applicant's arguments filed May 07, 2003 have been fully considered but they are not persuasive.

Applicant argued that Kanou does not disclose the shape of the protruding portions 73 in plan view and the feature "different in shape" recited in claim 1 regarding the protruding elements is not disclosed by the Kanou reference. The Examiner disagrees with the Applicant's remarks because Kanou discloses that the protruding portions may be formed pillar-shaped or strip-shaped (col. 6, lines 18-19). Accordingly, the protruding portions may have different shapes (rounded, squared, triangular, etc...) when viewed in plan view.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
